**MATHEMATICS**

**9709/61**

Paper 6 Probability & Statistics 1 (S1)

**May/June 2017**

**1 hour 15 minutes**

Candidates answer on the Question Paper.

Additional Materials: List of Formulae (MF9)

**READ THESE INSTRUCTIONS FIRST**

Write your Centre number, candidate number and name in the spaces at the top of this page.  
Write in dark blue or black pen.  
You may use an HB pencil for any diagrams or graphs.  
Do not use staples, paper clips, glue or correction fluid.  
**DO NOT WRITE IN ANY BARCODES.**

Answer **all** the questions.  
Give non-exact numerical answers correct to 3 significant figures, or 1 decimal place in the case of angles in degrees, unless a different level of accuracy is specified in the question.  
The use of an electronic calculator is expected, where appropriate.  
You are reminded of the need for clear presentation in your answers.

At the end of the examination, fasten all your work securely together.  
The number of marks is given in brackets [ ] at the end of each question or part question.  
The total number of marks for this paper is 50.

This document consists of **11** printed pages and **1** blank page.

1 Kadijat noted the weights,  $x$  grams, of 30 chocolate buns. Her results are summarised by

$$\Sigma(x - k) = 315, \quad \Sigma(x - k)^2 = 4022,$$

where  $k$  is a constant. The mean weight of the buns is 50.5 grams.

(i) Find the value of  $k$ . [2]

- 3 Redbury United soccer team play a match every week. Each match can be won, drawn or lost. At the beginning of the soccer season the probability that Redbury United win their first match is  $\frac{3}{5}$ , with equal probabilities of losing or drawing. If they win the first match, the probability that they win the second match is  $\frac{7}{10}$  and the probability that they lose the second match is  $\frac{1}{10}$ . If they draw the first match they are equally likely to win, draw or lose the second match. If they lose the first match, the probability that they win the second match is  $\frac{3}{10}$  and the probability that they draw the second match is  $\frac{1}{20}$ .
- (i) Draw a fully labelled tree diagram to represent the first two matches played by Redbury United in the soccer season. [2]

- (ii) Given that Redbury United win the second match, find the probability that they lose the first match. [4]

4 The times taken,  $t$  seconds, by 1140 people to solve a puzzle are summarised in the table.

Time ( $t$ seconds)	$0 \leq t < 20$	$20 \leq t < 40$	$40 \leq t < 60$	$60 \leq t < 100$	$100 \leq t < 140$
Number of people	320	280	220	220	100

(i) On the grid, draw a histogram to illustrate this information. [4]

(ii) Calculate an estimate of the mean of  $t$ . [2]
