## **MARK SCHEME for the May/June 2015 series**

### **0610 BIOLOGY**

**0610/51**

Paper 5 (Practical Test), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2015 series for most Cambridge IGCSE<sup>®</sup>, Cambridge International A and AS Level components and some Cambridge O Level components.

® IGCSE is the registered trademark of Cambridge International Examinations.

### Abbreviations used in the Mark Scheme

- ; separates marking points
- / separates alternatives within a marking point
- **R** reject
- **ignore** mark as if this material was not present
- **A** accept (a less than ideal answer which should be marked correct)
- **AW** alternative wording (accept other ways of expressing the same idea)
- underline words underlined (or grammatical variants of them) must be present
- **max** indicates the maximum number of marks that can be awarded
- **mark independently** the second mark may be given even if the first mark is wrong
- **ecf** credit a correct statement that follows a previous wrong response
- ( ) the word / phrase in brackets is not required, but sets the context
- **ora** or reverse argument
- **AVP** any valid point

<b>1 (a)</b>	drawing uses single clear unbroken lines with no shading ; drawing occupies at least half of the space provided ; minimum detail is outer layer and central area with segments indicated ; correctly labelled structure ;	[4]	
<b>(b) (i)</b>	buffer X yellow / orange buffer Y green / blue ;	[1]	1 mark for both colours correct
<b>(ii)</b>	buffer X pH5 buffer Y pH8 ;	[1]	1 mark for both pH values correct
<b>(c)</b>	four volumes completed ; units cm <sup>3</sup> ; B2 highest volume of juice ; A2 / C2 lowest volume of juice ;	[4]	
<b>(d) (i)</b>	B2 has a larger volume / A2 less or smaller volume / AW ; comparison of appearance of filtrate, i.e. B2 is clear and A2 is cloudy / transparent / AW ;	[2]
